All I own house

PKMN architectures

Biennale Architettura 2015
La Biennale di Venezia

All I Own House es un proyecto que materializa el interior de una casa a través de los objetos personales de la(s) persona(s) que la habita(n). A través de un cuidadoso diseño, hecho totalmente a medida, y de la combinación del trabajo de carpintería con el uso de un sencillo sistema de guías industriales, se organiza todo el espacio servidor de la casa mediante tres contenedores de madera OSB suspendidos, móviles y transformables.

All I Own House is a project that materializes the interior of a house through the personal belongings of the person or persons that occupy it. Through careful and totally custom design, and the combination of the cabinetry with a simple system of industrial linear rail guides, all of the house's service spaces are organized using three containers made from OSB wood panels that are suspended, mobile and transformable.
